

About Summit Digital:

Summit Digital, one of the largest telecom digital infrastructure providers in India with its industry-leading infrastructure and innovative business model, is in a unique position to help its customers embrace transformative business models. As a young organization with considerable potential, it is proud to have grown rapidly over recent years. It manages over 151,000+ active sites, a number that has been steadily increasing since the company was established. As well as being strategically positioned to cover every corner of the country with 2G, 3G, and 4G service, these towers are also positioned to support the implementation of 5G services in the future. Through the use of state-of-the-art digital infrastructure, the leading wireless telecommunications provider in the country is able to offer its customers uninterrupted data and voice services, enabling the companies to remain competitive on the market.

Summit Digital is committed to health, safety, sustainability, and environmental standards and operates with the highest levels of integrity and business ethics. Our sites are compatible with 2G, 3G, 4G and 5G communication technology standards of today and their future evolution. The same infrastructure can also be used for emerging technologies such as the Internet of Things, artificial intelligence, massive MIMO, and outdoor small cells and technologies of similar nature
